Aarons, J., R. S. Allen, Scintillation of a radio star at a subauroral latitude..... 1180
Acoustic-gravity wave propagation, justification of the use of multiple isothermal layers as an approximation to the real atmosphere for..... 265
Adachi, S., Theory of duct propagation of whistler radio waves..... 671
Adams, R. N., E. D. Denman, Precautionary note on stratification..... 851
Admittance of the infinite cylindrical antenna..... 1041
Allen, R. S., J. Aarons, Scintillation of a radio star at a subauroral latitude..... 1180
—, *J. P. Mullen*, Synoptic data from the ORBIS experiment..... 1225
Alternative representations of source-excited vector and scalar fields..... 619
Analysis of a double discontinuity in a coaxial line..... 397
Anderson, R. M., I. H. Gerks, Diffraction of radio waves in a stratified troposphere... 897
Angel echoes, dot, quantitative observations of, at two frequencies..... 537
Angle of arrival, Doppler, etc., effects of propagation on..... 1347
Angle-of-arrival measurements performed over a 296-km troposcatter path..... 1245
Angular spread of radio waves in long-distance propagation..... 743
Anisotropic medium, moving, radiation in..... 313
Antenna arrays, nonuniformly spaced, synthesis of, yielding approximately equal sidelobes..... 601
Antenna, cylindrical, in an isotropic compressible plasma, current distribution and impedance of..... 13
Antenna, driven cylindrical, electric field very near..... 353
Antenna, infinite helical sheath..... 589
Antenna, insulated linear, between layers of compressible plasma, impedance of... 1057
Antenna radiation, further explanation of the new theory of, with particular reference to uniaxial media..... 1020
Antenna, scattering, embedded in a dissipative half space, current in..... 1309
Antenna, short, resistance of, in a warm plasma..... 971
Antenna, slotted-sphere, immersed in a compressible plasma, theory of, Part III..... 21
Antenna theory, note on the evaluation of some constants of..... 411
Antennas..... 1371
Antennas, cylindrical, determination of the admittance and effective length of..... 835
Antennas, further experimental study of plasma sheath effects on..... 1263
Antennas in magnetoionic media, radiation resistance of, and irreversible power..... 1025
Antennas, prolate spheroidal, theories of..... 475
Antennas, spaced, effect of a specular component on the correlation between the signals received on..... 557
Application of conformal mapping to earth-flattening procedures in radio propagation problems..... 1435
Approximations to the double knife-edge attenuation coefficient..... 1439
Aronson, E. A., R. W. P. King, C. W. Harrison, Jr., Determination of the admittance and effective length of cylindrical antennas..... 835
Atmosphere, experimental analysis of..... 1341
Atmospheric Limitations to Optical Propagation, summary of papers presented at the Conference on..... 405
Atmospheric radio refractivity, world atlas of (digest of ESSA Monograph No. 1)..... 1113
Atmospheric structure from radio measurements..... 1342
Atmospheric structure, gross, general studies of..... 1344
Atmospheric structure, theoretical studies relating to..... 1342
Atmospheric turbulence and molecular scattering, deterioration of the coherence properties of a laser beam by..... 523
Atomic and/or universal time and frequency transmissions..... 1334
Atomic frequency standards, high-precision..... 1333
Attenuation measurements seasonal atmospheric, at 3.27 cm wavelength..... 1202
Aubry, M., M. Blanc, R. Clauvel, C. Taieb, P. J. Bowen, K. Norman, A. P. Willmore, J. Sayers, J. H. Wager, Some rocket results on Sporadic *E*..... 170
Auroral zone in winter, latitudinal and diurnal variations of the ionospheric electron content near..... 1135
Axford, W. I., D. M. Cunnold, The wind-shear theory of temperate zone sporadic *E*... 191
Axis far-field backscattering from flared symmetric bodies..... 825

B

Bachynski, M. P., F. J. F. Osborne, J. V. Gore, Time history of the magnetospheric cavity..... 419
Backscatter, incoherent, studies..... 1367
Backscattering, axis far-field, from flared axially symmetric bodies..... 825
Bahar, E., Propagation of VLF radio waves in a model earth-ionosphere waveguide of arbitrary height and finite surface impedance boundary: theory and experiment... 925
Baker, D. M., K. Davies, On frequency variations of ionospherically propagated HF radio signals..... 545
Balmain, K. G., Impedance of a radio-frequency plasma probe with an absorptive surface..... 1
Banks, P. M., Kinetic theory and collisional detachment..... 1293
Bannister, P. R., Quasi-static fields of dipole antennas at the earth's surface..... 1321
Bannister, R. W., H. A. Whale, Rotating interferometer and its use in measuring the spread and coherence ratio of a scattered radio wave..... 1237
Barker, J. J., M. D. Grossi, Design of a satellite-to-satellite communication experiment to explore HF/VHF guided propagation in the lower ionosphere..... 1229
Barry, G. H., M. R. Epstein, V. R. Frank, O. G. Villard, Jr., A comparison of long-distance HF radio-signal reception at high and low receiving sites..... 751
Barsis, A. P., L. G. Hause, Mountain obstacle diffraction measurements at 751 Mc/s and 9.2 Gc/s..... 61
Baseband multipath fading simulator..... 763
Basu, S., S. Sarkar, Satellite ORBIS experiment..... 1223
Bean, B. R., B. A. Cahoon, C. A. Samson, G. D. Thayer, A world atlas of atmospheric radio refractivity (digest of ESSA Monograph No. 1)..... 1113
Bedinger, J. F., H. B. Knaflich, Observed characteristics of ionospheric winds..... 156
Berry, L. A., J. R. Johler, On the effect of heavy ions on LF propagation, with special reference to the nuclear environment (digest)..... 303
Bertin, F., J. Papet-Lépine, E. Vassy, Geographical distribution of total electron content dependence on geomagnetic activity..... 1131
Bhattacharya, H., M. Rao, Effect of ionospheric reflections on the nature of the waveforms of radio atmospherics..... 309
Bhattacharya, P. K., A. K. Sinha, Vertical magnetic dipole buried inside a homogeneous earth..... 379
Bistatic radar method for the determination of ϵ and μ for a smooth spherical target... 995
Blanc, M., M. Aubry, R. Clauvel, C. Taieb, P. J. Bowen, K. Norman, A. P. Willmore, J. Sayers, J. H. Wager, Some rocket results on sporadic *E*..... 170
Block, W. F., A. G. Smith, W. A. Morton, G. R. Lebo, T. D. Carr, C. N. Olsson, Influence of the terrestrial environment on the temporal and statistical characteristics of Jovian decametric radiation..... 1167
Booker and Walkinshaw, mode theory of, comparison of experiments on duct propagation above the sea with..... 891
Boundary conditions for a unique solution to the linearized warm-plasma equations... 1067
Boundary scattering effects in underwater sound propagation..... 339
Bowen, P. J., M. Aubry, M. Blanc, R. Clauvel, C. Taieb, K. Norman, A. P. Willmore, J. Sayers, J. H. Wager, Some rocket results on sporadic *E*..... 170
Bowhill, S. A., A rocket experiment on the structure of sporadic *E*..... 187
—, Theories..... 248
—, *editor*, U.S.A. National Committee report to URSI, Commission 3, Progress in ionospheric radio..... 1351
Bowles, K. L., Radio measurements..... 242
Brief review of scintillation studies..... 1163
Briggs, B. H., Brief review of scintillation studies..... 1163
Brocks, K., H. Jeske, Comparison of experiments on duct propagation above the sea with the mode theory of Booker and Walkinshaw..... 891

C

Cahoon, B. A., B. R. Bean, C. A. Samson, G. D. Thayer, A world atlas of atmospheric radio refractivity (digest of ESSA Monograph No. 1)..... 1113
Calculations of apparent sky temperature at millimeter wavelengths..... 1205
Campbell, J. A., H. P. Taylor, A technique of observing the 5-mm self-emission from the oxygen of the earth's atmosphere to obtain a vertical sense..... 1209
Capetanopoulos, C., R. B. Kieburtz, Excitation of the whistler mode in the ionosphere by leakage from VLF guided-wave modes..... 859

Cassedy, E. S., Summary of the 1965 URSI Symposium at Delft, Netherlands: sessions on nonlinear and transient phenomena..... 1447
Castelli, J. P., Seasonal atmospheric attenuation measurements at 3.27 cm wavelength..... 1202
Cavity resonator modes in a cylindrically stratified magnetoplasma..... 655
Challinor, R. A., F. W. Chapman, D. L. Jones, J. D. W. Todd, Observations on the propagation constant of the earth-ionosphere waveguide in the frequency band 8 c/s to 16 kc/s..... 1273
Chan, K. L., On the topside ionosphere over the American Continents..... 1158
Change in polarization on reflection from a tilted plane..... 27
Chapman, F. W., D. L. Jones, J. D. W. Todd, R. A. Challinor, Observations on the propagation constant of the earth-ionosphere waveguide in the frequency band 8 c/s to 16 kc/s..... 1273
Characteristics of ionospheric E_s propagation and calculation of E_s signal strength... 99
Characteristics of ionospheric sporadic *E* signals..... 145
Characteristics of ionospheric winds, observed..... 156
Chawla, B. R., H. Unz, Note on the Lorentz transformation for a moving anisotropic plasma..... 1055
Checcacci, P. F., Ionospheric measurements by means of the Early Bird geostationary satellite..... 1154
Chen, C-L., Infinite helical sheath antenna..... 589
Chen, Y. M., On wave propagation in large waveguides containing random media... 697
Circuits..... 1374
Clauvel, R., M. Aubry, M. Blanc, C. Taieb, P. J. Bowen, K. Norman, A. P. Willmore, J. Sayers, J. H. Wager, Some rocket results on sporadic *E*..... 170
Coastline, propagation of VLF waves past..... 1411
Coaxial connectors, precision..... 1336
Coaxial line, analysis of a double discontinuity in..... 397
Cochran, J. A., R. G. Peters, Mode propagation in continuously curved waveguides... 679
Coherence properties of a laser beam, deterioration of, by atmospheric turbulence and molecular scattering..... 523
Cole, K. D., R. B. Norton, Some problems associated with midlatitude sporadic *E*... 235
Collisional detachment, kinetic theory and..... 1293
Collisions, effect of, upon the virtual heights of low-frequency radio waves reflected from the ionosphere..... 769
Comparison of experiments on duct propagation above the sea with the mode theory of Booker and Walkinshaw..... 891
Comparison of long-distance HF radio-signal reception at high and low receiving sites..... 751
Comparison of time-delay spread and spatial coherence for ionospheric propagation... 285
Compressible plasma, impedance of an insulated linear antenna between layers of... 1057
Compressible plasma layers, slot admittance for..... 457
Conformal mapping, application of, to earth-flattening procedures in radio propagation problems..... 1435
Conical microwave beam entering a particular nonuniform plasma column, point of emergence of..... 295
Consortini, A., L. Ronchi, A. M. Scheggi, G. Toraldo di Francia, Deterioration of the coherence properties of a laser beam by atmospheric turbulence and molecular scattering..... 523

Cuchet, L., Role of a complex ionic composition in the wind-shear theory of sporadic-*E* layers 1101
Cullen, A. L., On the point of emergence of a conical microwave beam entering a particular nonuniform plasma column 295
Cunnold, D. M., W. I. Axford, The wind-shear theory of temperate zone sporadic *E* 191
Current distribution and impedance of a cylindrical antenna in an isotropic compressible plasma 13
Current in a scattering antenna embedded in a dissipative half space 1309
Cylinder, plasma-immersed, excitation of surface currents on, by electromagnetic and electrokinetic waves, I, the vacuum sheath 977
Cylinder, plasma-immersed, excitation of surface currents on, by electromagnetic and electrokinetic waves, II, the inhomogeneous sheath 1425
Cylindrical antenna, driven, the electric field very near 353
Cylindrical antenna, infinite, admittance of 1041
Cylindrical antennas, determination of the admittance and effective length of 835
Cylindrical impedance probe for magnetoplasma, quasi-static theory of 1297
Cylindrical warm plasma, potentials for 799
Cylindrically stratified magnetoplasma, propagation of waveguide modes in 641

D

Darlington, S., L. B. Felsen, K. M. Siegel, editors, U.S.A. National Committee report to URSI, Commission 6, Progress in radio waves and transmission of information 1371

Denman, E. D., R. N. Adams, Precautionary note on stratification 851
Design of a satellite-to-satellite communication experiment to explore HF/VHF guided propagation in the lower ionosphere 1229
Deterioration of the coherence properties of a laser beam by atmospheric turbulence and molecular scattering 523
Determination of the admittance and effective length of cylindrical antennas 835
deWolf, D. A., Impedance of a small VLF dipole in the ionosphere 571
Diffraction and scattering 1372
Diffraction of a pulse by a wedge, contour plots for 609
Diffraction of radio waves in a stratified troposphere 897
Digest of ESSA Monograph No. 1, A world atlas of atmospheric radio refractivity 1113
Digest of NBS Technical Note 325, Numerical simulation of ionospheric wave interaction experiments 531
Dipole antennas at the earth's surface, quasi-static fields of 1321
Dipole in an infinite planar phased array, radiation impedance of 361
Dipole, magnetic, vertical, buried inside a homogeneous earth 379
Dipole, small VLF, impedance of, in the ionosphere 571
Discontinuity, double, in a coaxial line, analysis of 397
Dissipative half space, current in a scattering antenna embedded in 1309
Dobrott, D. R., Propagation of VLF waves past a coastline 1413
Doppler, angle of arrival, etc., effects of propagation on 1347
Doppler frequency changes in radio waves propagating through a moving ionosphere 257
Doran, J. A., A. Erteza, A bistatic radar method for the determination of ϵ and μ for a smooth spherical target 995
Dot angel echoes, quantitative observations of, at two frequencies 537
Double knife-edge attenuation coefficient, approximations to 1441
D region, effective recombination coefficient in 1397
D-region morphology 1351
D-region radio pulse interaction measurements, numerical method for interpreting 1077
D-region theory 1352
Drifting isotropic warm plasma, wave propagation in 325
Duct propagation above the sea, experiments on, comparison of, with the mode theory of Booker and Walkinshaw 891

E

Early Bird geostationary satellite, ionospheric measurements by means of 1154
Earth crust waveguide, idealized, electromagnetic propagation in 913
Earth-flattening procedures in radio propagation problems, application of conformal mapping to 1435
Earth-ionosphere waveguide, model, of arbitrary height and finite surface impedance boundary, propagation of VLF radio waves in: theory and experiment 925
Earth-ionosphere waveguide, observations on the propagation constant of, in the frequency band 8 c/s to 16 kc/s 1273
Earth-ionosphere waveguide, possible mechanism for excessive mode conversion in 1073
Earth's crust, propagation of electromagnetic waves along and in 1345
Edgar, B. C., K. R. Cook, Current distribution and impedance of a cylindrical antenna in an isotropic compressible plasma 13
Effect of a specular component on the correlation between the signals received on spaced antennas 557
Effect of collisions upon the virtual heights of low-frequency radio waves reflected from the ionosphere 769

Page

Effect of ionospheric reflections on the nature of the waveforms of radio atmospherics 309
Effect of meteoric dust on the effective recombination coefficient in the lower ionosphere 1401
Effective recombination coefficient in the *D* region 1397
Effective recombination coefficient in the lower ionosphere, effect of meteoric dust on 1401
Effects of ions on whistler-mode ray tracing 269
Electric field very near a driven cylindrical antenna 353
Electric line current source located in an ionospheric halfspace, VLF radiation in air from 53
Electromagnetic propagation in an idealized earth crust waveguide 913
Electromagnetic scattering by loaded wire loops 347
Electromagnetic waves from moving sources, radiation and propagation of 1029
Electromagnetic waves in a magnetoplasma, nonlinear interaction of a number of 1089
Electromagnetic waves, propagation of along and in the earth's crust 1345
Electron content, ionospheric, latitudinal and diurnal variations of, near the auroral zone in winter 1135
Electron content, ionospheric, variation in, measured by radio waves from Syncom 3 1145
Electron content measurements at Delhi from Faraday fading of S–66 transmissions, some results of 1125
Electron content, total, dependence on geomagnetic activity, geographical distribution of 1131
Electron content, total, ionospheric, middle-latitude 1149
Electrons in the ionosphere, parameters of a cloud-like distribution of 1171
Elkins, T. J., Influence of solar protons on high-latitude ionospheric disturbance 1195
Emergence, point of, of a conical microwave beam entering a particular nonuniform plasma column 295
E_s propagation, ionospheric, characteristics of, and calculation of E_s signal strength 99
Epstein, M. R., V. R. Frank, G. H. Barry, O. G. Villard, Jr., A comparison of long-distance HF radio-signal reception at high and low receiving sites 751
E region, note on the influx of extraterrestrial dust as an energy source in 252
E region, prevailing and tidal wind shears in 169
Erickson, W. C., The maximum resolution of a radio telescope imposed by coronal scattering 109
Erteza, A., J. A. Doran, A bistatic radar method for the determination of ϵ and μ for a smooth spherical target 995
Excessive mode conversion in the earth-ionosphere waveguide, a possible mechanism for 1073
Excitation of surface currents on a plasma-immersed cylinder by electromagnetic and electrokinetic waves, I, the vacuum sheath 977
Excitation of surface currents on a plasma-immersed cylinder by electromagnetic and electrokinetic waves, II, the inhomogeneous sheath 1425
Excitation of the lower hybrid resonance by an antenna in the ionosphere 447
Excitation of the whistler mode in the ionosphere by leakage from VLF guided-wave modes 859
Experimental results of VLF dipole tests on the Greenland ice cap 1003
Experimental study of the structure of sporadic *E* (summary) 145
Extraterrestrial dust, note on the influx of, as an energy source in the *E* region 252

—, —, Numerical solution of full-wave equation with mode coupling 957
Interferometer, rotating, and its use in measuring the spread and coherence ratio of a scattered radio wave 1237
Interferometer system, phase-sweep, high-latitude radio star scintillation measurements at 68 Mc/s made with 1176
Investigation of the mode conversion at a modeled sunrise change in ionosphere effective height 887
Ion composition and diffusion above the *F* region 1366
Ion composition and electron temperature, direct observations of 1367
Ionized media, propagation and radiation in 1372
Ionosphere, effect of collisions upon the virtual heights of low-frequency radio waves reflected from 769
Ionosphere effective height, investigation of the mode conversion at a modeled sunrise change in 887
Ionosphere, excitation of the lower hybrid resonance by an antenna in 447
Ionosphere, gradient instabilities as possible causes of irregularities in 1283
Ionosphere, impedance of a small VLF dipole in 571
Ionosphere, lower, effect of meteoric dust on the effective recombination coefficient in 1401
Ionosphere, parameters of a cloud-like distribution of electrons in 1171
Ionosphere, topside, over the American Continents 1158
Ionospheric currents, sporadic *E* and 204
Ionospheric disturbance, high-latitude, influence of solar protons on 1195
Ionospheric dynamics and drift 1353
Ionospheric electron content near the auroral zone in winter, latitudinal and diurnal variations of 1135
Ionospheric halfspace, VLF radiation in air from an electric line current source located in 53
Ionospheric measurements by means of the Early Bird geostationary satellite 1154
Ionospheric propagation above the standard MUF, transmission loss for 1303
Ionospheric propagation, comparison of time-delay spread and spatial coherence for 285
Ionospheric reflections, effect of, on the nature of the waveforms of radio atmospherics 309
Ionospheric sporadic *E* signals, characteristics of 145
Ionospheric valley ambiguity, phase height and 441
Ionospheric wave interaction experiments, numerical simulation of (digest of NBS Technical Note 325) 531
Ionospheric whispering gallery, geometric optics investigation of HF and VHF guided propagation in 877
Ionospheric wind patterns 246
Ionospheric winds, observed characteristics of 156
Ionospheric winds, space and time correlations of 149
Ionospherically propagated HF radio signals, frequency variations of 545
Ions, mixtures of, in the wind-shear theory of sporadic *E* 198
Irreversible power and radiation resistance of antennas in magnetoionic media 1025

Proceedings of the Sporadic *E* Seminar

Page

Proceedings of the seminar on the cause and structure of temperate latitude sporadic *E*. Ernest K. Smith and Sadami Matsushita..... i

Preface to "Proceedings of the Sporadic *E* Seminar" Papers. S. A. Bowhill..... i

Some introductory and background comments on our state of knowledge of sporadic *E*. E. K. Smith..... 129

The structure of the sporadic *E* layer detected from VHF ionospheric propagation. Kazuhiko Tao..... 132

Experimental study of the structure of sporadic *E* (Summary). A. Spizzichino and A. Giraud..... 145

Characteristics of ionospheric sporadic *E* signal. K. Miya..... 145

Space and time correlations of ionospheric winds. N. W. Rosenberg and C. G. Justus..... 149

Observed characteristics of ionospheric winds. J. F. Bedinger and H. B. Knaflich..... 156

Prevailing and tidal wind shears in the *E* region. C. O. Hines..... 169

Some rocket results on sporadic *E*. M. Aubry, M. Blanc, R. Clauvel, C. Taieb, P. J. Bowen, K. Norman, A. P. Willmore, J. Sayers, J. H. Wager..... 170

Rocket observations of sporadic *E* and related features of the *E* region. L. G. Smith..... 178

A rocket experiment on the structure of sporadic *E*. S. A. Bowhill..... 187

The wind-shear theory of temperate zone sporadic *E*. W. I. Axford and D. M. Cunnold..... 191

Mixtures of ions in the wind-shear theory of sporadic *E*. J. D. Whitehead... 198

Sporadic *E* and ionospheric currents. S. Matsushita..... 204

Formation of sporadic *E* layers at temperate latitudes due to vertical gradients of charge density. Takao Tsuda, Tetsuya Sato, and Ken-ichi Maeda..... 212

Theoretical basis of the formation of sporadic *E* due to wind motion in the ionosphere. S. Kato..... 226

Some problems associated with midlatitude sporadic *E*. Keith D. Cole and Richard B. Norton..... 235

Summary and conclusions from the Estes Park sporadic *E* seminar:

1. Radio measurements. Kenneth L. Bowles..... 242
2. Rocket measurements. L. G. Smith..... 244
3. Ionospheric wind patterns. N. W. Rosenberg..... 246
4. Theories. S. A. Bowhill..... 248
5. Future plans. C. O. Hines..... 250

A note on the influx of extraterrestrial dust as an energy source in the *E* region. Giorgio Fiocco..... 252

Page

Doppler frequency changes in radio waves propagating through a moving ionosphere. J. A. Jacobs and T. Watanabe..... 257

Justification of the use of multiple isothermal layers as an approximation to the real atmosphere for acoustic-gravity wave propagation. Allan D. Pierce..... 265

Effects of ions on whistler-mode ray tracing. Iwane Kimura..... 269

Comparison of time-delay spread and spatial coherence for ionospheric propagation. Karl. D. Felperin..... 285

On the point of emergence of a conical microwave beam entering a particular nonuniform plasma column. A. L. Cullen..... 295

On the effect of heavy ions on LF propagation, with special reference to the nuclear environment (Digest). J. Ralph Johler and Leslie A. Berry... 303

Effect of ionospheric reflections on the nature of the waveforms of radio atmospherics. H. Bhattacharya and Manoranjan Rao..... 309

Radiation in a moving anisotropic medium. S. W. Lee and Y. T. Lo..... 313

Wave propagation in drifting isotropic warm plasma. H. Unz..... 325

Boundary scattering effects in underwater sound propagation. H. W. Marsh and R. H. Mellen..... 339

Electromagnetic scattering by loaded wire loops. Roger F. Harrington and Joseph L. Ryerson..... 347

The electric field very near a driven cylindrical antenna. Ronold W. P. King and Tai Tsun Wu..... 353

Radiation impedance of a dipole in an infinite planar phased array L. Stark..... 361

Vertical magnetic dipole buried inside a homogeneous earth. A. K. Sinha and P. K. Bhattacharya..... 379

Analysis of a double discontinuity in a coaxial line. F. A. Hinchey and Sheila Prasad..... 397

A summary of papers presented at the Conference on Atmospheric Limitations to Optical Propagation. Jurgen R. Meyer-Arendt..... 405

A note on the evaluation of some constants of antenna theory. R. A. Hurd..... 411

Volume 1 (New Series), No. 4, April 1966

Page

Time history of the magnetospheric cavity, F. J. F. Osborne, M. P. Bachynski, and J. V. Gore..... 419
Magneto-ionic coupling in an inhomogeneous anisotropic medium. Yuji Inoue and Samuel Horowitz..... 427
Phase height and the ionospheric valley ambiguity. Adolf K. Paul..... 441
Excitation of the lower hybrid resonance by an antenna in the ionosphere. J. A. Fejer..... 447
Slot admittance for compressible plasma layers. Janis Galejs..... 457
Theories of prolate spheroidal antennas. James R. Wait..... 475
On the determination of VLF propagation parameters by field strength measurements over medium distances. J. Frisius..... 513
Deterioration of the coherence properties of a laser beam by atmospheric turbulence and molecular scattering. A. Consortini, L. Ronchi, A. M. Scheggi, and G. Toraldo di Francia..... 523
Numerical simulation of ionospheric wave interaction experiments (Digest of NBS Technical Note 325). T. M. Georges..... 531

Volume 1 (New Series), No. 5, May 1966

Page

Quantitative observations of dot angel echoes at two frequencies. Andrew P. Deam and Alfred H. LaGrone..... 537
On frequency variations of ionospherically propagated HF radio signals. Kenneth Davies and Donald M. Baker..... 545
The effect of a specular component on the correlation between the signals received on spaced antennas. H. A. Whale and C. W. Gardiner..... 557
Impedance of a small VLF dipole in the ionosphere. D. A. deWolf..... 571
Radiation from a magnetic line source located on a conducting plane covered by a warm plasma layer. Norman C. Wenger..... 577
Infinite helical sheath antenna. Chin-Lin Chen..... 589
Synthesis of nonuniformly spaced antenna arrays yielding approximately equal sidelobes. M. T. Ma and Lillie C. Walters..... 601
Contour plots for the diffraction of a pulse by a wedge. John I. Makhoul... 609

Volume 1 (New Series), No. 6, June 1966

Page

Preface to "Mode Theory of Wave Propagation" papers. James R. Wait... i
Alternative representations of source-excited vector and scalar fields. Leopold B. Felsen and N. Marcuvitz..... 619
Transverse propagation of waveguide modes in a cylindrically stratified magnetoplasma. James R. Wait..... 641
Cavity resonator modes in a cylindrically stratified magnetoplasma. David B. Large and James R. Wait..... 655
Wave propagation in plasma waveguides. J. Webber and G. D. Sims..... 659
Theory of duct propagation of whistler radio waves. Saburo Adachi..... 671
Mode propagation in continuously curved waveguides. J. Alan Cochran and Robert G. Pecina..... 679
On wave propagation in large waveguides containing random media. Yung Ming Chen..... 697
A normal mode theory of an underwater acoustic duct by means of Green's function. Roy L. Deavenport..... 709

Volume 1 (New Series), No. 7, July 1966

Page

Transhorizon propagation measurements from a simultaneous frequency and angle scan experiment. J. W. Strohbehn and A. T. Waterman, Jr... 729
The angular spread of radio waves in long-distance ionospheric propagation. H. A. Whale..... 743
A comparison of long-distance HF radio-signal reception at high and low receiving sites. M. R. Epstein, V. R. Frank, G. H. Barry, and O. G. Villard, Jr..... 751
Baseband multipath fading simulator. W. F. Walker..... 763
The effect of collisions upon the virtual heights of low-frequency radio waves reflected from the ionosphere. A. J. Ferraro and C. P. Tou..... 769
Groundwave propagation across semi-infinite strips and islands on a flat earth. R. J. King and W. I. Tsukamoto..... 775
Quasi-oscillations of cold, sharply bounded plasmas. William M. Leavens and Ileana B. Leavens..... 789
Potentials for cylindrical warm plasmas. Maurice I. Sancer..... 799
Wave propagation in plasmas with very strong magnetic field. S. W. Lee, C. Liang, and Y. T. Lo..... 815
On axis far-field backscattering from flared axially symmetric bodies. Herschel Weil and Joseph L. Raymond..... 825
Determination of the admittance and effective length of cylindrical antennas. R. W. P. King, E. A. Aronson, and C. W. Harrison, Jr..... 835
Precautionary note on stratification. Roy N. Adams and Eugene D. Denman..... 851

Additional papers on "Mode Theory of Wave Propagation"

Page

Excitation of the whistler mode in the ionosphere by leakage from VLF guided-wave modes. C. Capetanopoulos and R. B. Kieburtz..... 859

Geometric optics investigation of HF and VHF guided propagation in the ionospheric whispering gallery. M. D. Grossi and B. M. Langworthy..... 877

Investigation of the mode conversion at a modeled sunrise change in ionosphere effective height. John J. Hicks..... 887

Comparision of experiments on duct propagation above the sea with the mode theory of Booker and Walkinshaw. Helmut Jeske and Karl Brocks..... 891

Diffraction of radio waves in a stratified troposphere. Irvin H. Gerks and Ronald M. Anderson..... 897

Electromagnetic propagation in an idealized earth crust waveguide. James R. Wait..... 913

Propagation of VLF radio waves in a model earth-ionosphere waveguide of arbitrary height and finite surface impedance boundary: theory and experiment. E. Bahar..... 925

Regular Contributions

Survey of VLF electric fields in the magnetosphere with the polar orbiting spacecraft, 1964–45A. F. L. Scarf, G. M. Crook, and R. W. Fredricks... 939

Numerical solution of full-wave equation with mode coupling. Yuji Inoue and Samuel Horowitz..... 957

Resistance of a short antenna in a warm plasma. H. H. Kuehl..... 971

Excitation of surface currents on a plasma-immersed cylinder by electromagnetic and electrokinetic waves. I. The vacuum sheath. E. K. Miller and A. Olte..... 977

A bistatic radar method for the determination of ϵ and μ for a smooth spherical target. A. Erteza and J. A. Doran..... 995

Experimental results of VLF dipole tests on the Greenland ice cap. T. L. Johnson and G. M. R. Winkler..... 1003
